The Spanish History Index was created by Inaki Lpez Martn, historian and webmaster, in 1995 and became part of the WWW-VL History Network in May 1999. This index is part of a joint project between the [European University Institute's Library](#) and the [History & Civilisation Department](#). The Spanish History Index is made of different pages which are always under construction and in continuous evolution. You will find here virtual resources produced in Spain together with world-wide resources dealing with the history of Spain.

The WWW VL Spanish History Index awards this logo to the [best Spanish History WWW Resources](#).
